

The Smoker

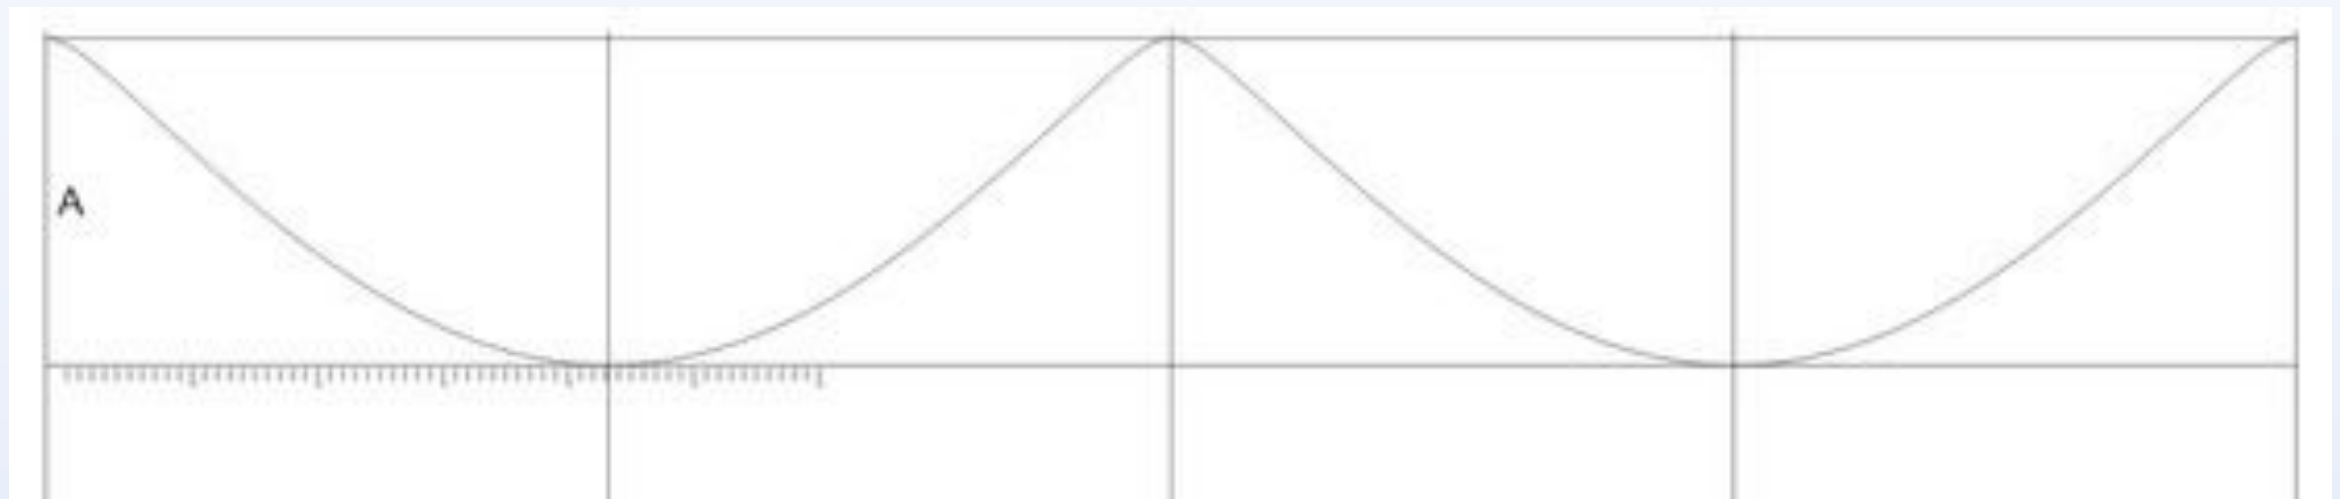

Building a smoker from 55 gallon drums

Northern Indiana
May 29th, 2011

Jonathan Hoyt
Ordered List

Step 1: get someone to print this curve for you to scale, 72" wide

Step 2: Get a couple 55 gallon drums

**Step 3: Affix the curve to one drum
and then cut along the curve**

**NOTE: Get
your dad to
help you!**

**Step 4: Set the
2nd drum on the
first (now that its
cut) and rejoice
in your progress**

Step 5: Cut the door openings

**Step 5: Burn
the barrels,
removing
junk inside**

**Step 6: Attach
2 inch strips of
tin as a lip for
the lids (make
sure to make a
funny look)**

Step 7: Attach top to bottom using screws and rivets

**This is what it
looks like from
the inside of the
bottom barrel**

Step 8: Attach lid & fire door using hinges and rivets

**Step 9: Attach
clasps and
ponder the
awesomeness**

Step 10: Enlist your brother in law and build a vent

Step 11: Attach handles!

Step 12: Get your brother in law and wife to paint it for you :)

**Pose like you
painted it :)**

Step 13: Attach thermometer

Step 14: Attach chimney

**Step 15: Drill
holes from top
barrel into
bottom barrel**

**Step 16: Insert
grates and
gaze in awe**

Step 17: Attach chimney flume while smoker is running (not actually recommended)

Step 18: Make a bigger better coal basket out of an old canning kettle

Step 19: BBQ some meat!

**Step 20: Cut
the meat**

Enjoy with family and friends!!!
